EXAMINER'S AMENDMENT

Election/Restrictions

1. Applicant's election of Group I, claims 54-71 and 79-97 in the reply filed on 2 February, 2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. This application is in condition for allowance except for the presence of claims 72-78 and 98-104 directed to a wind turbine apparatus and method including a control system (Group II), non-elected without traverse. Accordingly, claims 72-78 and 98-104 have been cancelled.
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Todd Oberdick, Reg. No. 44,268 on 21 May, 2009.

The application has been amended as follows:

IN THE CLAIMS:

In claim 54, line 3, --of the wind turbine, the rotating means comprising one or more shafts-- has been inserted after "means"

Art Unit: 3745

In claim 54, line 4, “at the” has been changed to –during--

In claim 57, line 1, “the moving of” has been deleted

In claim 65, line 3, --securing-- has been inserted before “at”

In claim 65, line 3, “being secured” has been deleted

In claim 65, line 4, --of the wind turbine, the rotating means comprising one or more shafts,--

In claim 65, line 4, “and connected to the rotating means,” has been changed to –connecting--

In claim 65, line 4, --to the rotating means-- has been inserted after “device”

In claim 65, line 5, --during transportation-- has been inserted after “still”

In claim 65, line 7, --during transportation—has been inserted after “still”

Claims 72-78 have been cancelled.

Claims 79-97 have been cancelled.

Claims 98-104 have been cancelled.

4. The above changes to claim 54 have been made to provide proper antecedent basis, positively recite the wind turbine as structure, and to remove potentially indefinite or confusing language.

5. The above change to claim 57 has been made to remove potentially indefinite or confusing language.

Art Unit: 3745

6. The above changes to claim 65 have been made to provide proper antecedent basis, positively recite the wind turbine as structure, and to correctly present the process in definite method steps which are different from those in claim 54.

7. Claims 79-97 have been cancelled to place the application in better condition for allowability.

8. Claims 79-97 and 98-104 have been cancelled to place the application in better condition for allowability because they belong to Group II claims, non-elected without traverse.

9. The following is an examiner's statement of reasons for allowance: The prior art neither anticipates nor renders obvious the method of moving the rotating parts of a wind turbine as the turbine is in either moving or at a standstill during transit from manufacture to installation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

10. Patents to Murray [U.S. 2,335,692], Leonard, Jr [U.S. 2,725,241], Benson [U.S. 2,808,288] and Baur et al. [U.S. 5,947,665] are cited for disclosing methods of

Art Unit: 3745

transportation including rotation of the transported item, including airfoils and wings, but do not disclose the rotation of a wind turbine shaft assembly during transport.
